Business Information

NOT OPEN ON SUNDAYS. We do not have help to dig stock on Saturdays but if you want to pick up stock on Saturday let us know long enough in advance so we can have it ready for you.

THESE PRICES are in effect Spring 1956.

ALL OUR STOCK is fresh dug for each order. None of it is in storage except strawberry plants.

PRICES named in this Trade List apply only to orders placed by nurserymen, florists, and dealers. Maryland customers are subject to 2% sales tax or send your License Number. All delivery costs are to be paid by purchaser.

PACKING. All goods are packed in boxes and bales for which we charge sufficient to cover cost of material used. We will add this cost to your invoice. **This cost applies whether you remit with order or buy on time terms.**

CLAIMS, if any, must be made immediately upon receipt of goods, and if just, made satisfactory, but in no case are we responsible for more than the purchase price of the stock in question. **We will not be responsible for failure to fill orders in full or for any damage or delay to stock after delivery to the transportation company.**

TERMS. We offer the usual terms: net 30 days from date of shipment to those of known responsibility but must have satisfactory business references from others or remittance must accompany order. Those desiring stock shipped C.O.D. will please remit one-fourth the amount of their purchase when ordering. Other terms by special arrangement.

NON-WARRANTY. We give no warranty, expressed or implied, the purchaser assuming all risk and responsibility of transportation, growth, planting, life of stock or any other matter on any stock we sell. We send out good stock, carefully grown and packed but cannot control conditions after it leaves our care. We exercise the greatest care to keep our stock true to name and are willing to replace on proper proof any stock that may prove otherwise, or refund the amount paid us for such stock, but it is mutually agreed that we shall not at any time be liable for any greater amount.

TELL US HOW TO SHIP, whether by express, motor truck, or railroad freight. If by motor truck or railroad freight, tell us the route or over which line you want delivery made. If you do not give this information we will use our own judgment as to route and methods to use. **It is mutually agreed that whether you name the route or leave it to our own selection, we will not in any way be responsible for time or condition of delivery and our responsibility ceases upon our delivery to the transportation company.**

HARDINESS OF PLANTS. When hardiness of plants is mentioned herein it applies to this section.

TIME OF SHIPMENT. We ship most every week in the year with the possible exception of during the winter when bad weather makes it impossible, although this is very seldom. Of course, there is a regular season for shipping, the different plants, but if you want them out of season and are willing to take the risk of good delivery, we will pack with the utmost care and get them off to you at most any time you want them.

Plan to Visit Our Nursery

We will certainly be glad to have you come to see our stock for yourself. We believe you will find it compares favorably with that grown by other nurseries. Some of our customers have told us it is better than is furnished by some others. We are on the Eastern Shore of Maryland, 100 miles south of Wilmington, Delaware, 100 miles from Kiptopeke-Norfolk, Va., ferry, 90 miles from Annapolis, Md., via Chesapeake Bay Bridge, 150 miles from Baltimore, Md., via Elkton, Md., 225 miles from New York, N. Y. We hope you can come to see our stock. It is good driving on the famous Eastern Shore.

Root Cuttings better and quicker with **ROOTONE**

Just Dust and Plant

No Solutions No Waiting No Watching

We recommend ROOTONE because we have found it of much help to us in rooting cuttings, both in saving of time and in increased roots to the cutting. We use it on all the cuttings we plant. We know it pays us both in better roots and time saved in cutting beds.

2-oz. jar **\$1.00**; 1-lb. can **\$5.00** postpaid

ALUMINUM PLANT TAGS

Very convenient to use. Lasts years. ¾ inch wide,
3½ inches long.

Made of thin aluminum. Can be embossed with ordinary lead pencil just like writing on an ordinary wood label. Permits writing label right in field.

100 for \$3.50, 500 for \$15.00, 1000 for \$25.00 Postpaid.

THE RARE FRANKLINIA

Here is a plant that just keeps growing in popularity. To see the bloom and fall foliage makes one want it in his own garden. See page 22.

BOXWOOD

Boxwood is another of our specialties and by growing it in the quantities we do, we are enabled to furnish it at these very low prices. This Boxwood is first-class in every way. We have customers who send us repeat orders several times during a season. We know you will like our Boxwood if you will let us send you some of it. **Good Stock, Good Service, and Low Prices.**

	Each	10	100	1000
BUXUS HARLANDI. New, dwarf, beautiful, dense and compact. Leaves long; slow grower.

8 to 10 in. B&B.....	1.50	12.50		
BUXUS MICROPHYLLA var. COMPACTA. New, rare, extremely dwarf and hardy Boxwood. Has stood all weather conditions in the Pocono Mountains where temperature drops below zero. Very dwarf and slow growing. Ideal for edging, rockeries, Knott gardens and all uses where plants are required to remain dwarf. Original plant after twenty-eight years, is now about 12 inches high and 21 inches wide. A rare gem. Stock very limited.				
* 2 in. pot plants 1 yr.....	\$3.00	\$25.00		
BUXUS SEMPERVIRENS. An old-time favorite in gardens and much used for hedges as well as for specimen plants. This is called the Bush Box and is a faster growing type than <i>Suffruticosa</i> Box. If you want the real dwarf growing kind you should get <i>Suffruticosa</i> .				
* 3 to 4 in. trans.....	\$2.25	\$17.50		
* 4 to 6 in. trans.....	2.75	22.50		
* 8 to 10 in. trans.....	4.00	35.00

CAMELLIA SASANQUA

These handsome flowering evergreens have proven entirely hardy here and we believe they are as hardy as the Kurume Azaleas. They bloom from September until freezing weather. The demand for these plants is increasing about as much as for any plant we grow. Suggest you try them and treat them about as you would the Kurume Azaleas as to soil and culture.

This nursery was started just 50 years ago by the present owner. We have made many mistakes but we believe our customers will agree that we have always tried to give a dollar in value for every dollar received. This will be our aim as long as The Tingle Nursery Co. stays in business. If you have any reason for complaint, tell us.

HEMEROCALIS (DAY LILY)

COLORED PLATE BOOK

A brand new plate book, just published, much more complete and up-to-date than the one we previously offered. Has 96 pages of colored pictures with descriptions. Size, 8½ x 11 inches. We think it is well worth the price of \$4.00 postpaid.

AUNT MARY'S SWEET CORN

THE SWEET CORN SUPREME

This is the most wonderful Sweet Corn we have ever grown. One grower describes it as "the best Sweet Corn in the world."

Has the most delicious flavor and keeps a long time before becoming too hard to use. In fact, usually requires artificial heat to cure it for seed purposes.

Aunt Mary's Corn, by its excellent quality, sweetness, and flavor makes a stronger appeal to the Corn-loving public than most any other variety and that appeal continues long after you are tired of other Sweet Corns.

Liberal size packets, 35c each; 3 for \$1.00, postpaid.

If after growing this wonderful Sweet Corn you are not entirely satisfied, we will refund every cent you paid us for it.

HOLLY (Ilex)

For many years we have been urging nurserymen to grow more holly. Fifteen years ago there was not very much demand for holly. If you will refer to our catalogs about that time and since, you will find we said, "The nurseryman who will grow a collection of Hollies to a specimen size will have something he can sell, whether times are good or whether they are bad. There is always a demand for them, and there will be as long as any other plants will sell."

Try to buy nice holly now, see how scarce it is. We find demand increasing each season.

	Each	10	100	1000
AQUIFOLIA Femina. The cuttings in this lot were taken from trees when not in bloom or fruit, but are from named varieties. A very good selection and buy, if not particular in having the variety named. Berry bearing.

HOLLIES • A new book by H. H. Hume.

Nurserymen and gardeners (amateur and professional) all have been waiting eagerly for a book of this sort. This is the most complete book on Hollies ever published.

In this book is the help and information as to varieties, propagation, planting, culture and orcharding of Hollies.

The many varieties of American, English, Chinese and Japanese are fully described and discussed. Many black and color illustrations.

AS GOOD AS CAN BE GROWN

We are exerting effort to produce the very best stock that can be grown, and in our fifty years' experience we believe we have never offered bigger values than we are offering this season. Even with the short supply of Lining-Out stock we have kept our prices at a low level. We feel sure you will be more than pleased with the stock we send you if you give us your order.

We try to secure our propagating wood from only the very best type of plants, and by doing this we can furnish you stock that should be of the best that it is possible for you to get anywhere, regardless of price.

Tree Peonies

Because of their novelty and great beauty, Tree Peonies are rapidly becoming one of the most desired plants. They bloom earlier than ordinary Chinese Peonies and their flowers are of immense size. See page 23 for prices and descriptions.

The Rare Franklinia

A Very Unusual Flowering Tree

Each twig develops at its tip a cluster of buds of graduated size, like overgrown greenish pearls. Early in August the largest of these attain the size of marbles. Then the guard petal folds back, still retaining its firm spherical form. From this shelter emerges four other petals, satiny, snowy white, elaborately frilled and pleated. The snowy, frilly chalice, three inches in diameter, holds a sumptuous mass of orange-gold stamens and breathes forth a delicate, balmy fragrance.

Each flower lasts two or three days and then drops cleanly. There is a constant succession of blooms till hard frost. We frequently get the unusual effect of a tree clad in crimson, autumn foliage and abundantly starred with white flowers.

The Franklinia begins blooming when not more than 3 or 4 feet high. Young trees under favorable conditions increase in height a foot or more each season. Specimens 30 feet high are known. It develops naturally with several trunks, but may easily be trained to a single trunk by removing the sprouts which start from the base.

Franklinia prefers full sun, has proved entirely hardy about New York and hardy in favorable locations about Boston, Mass., and in Ohio.

TAXUS (Yew)

The Taxus are undoubtedly the most popular and useful of all the ornamental evergreens. We have been growing them extensively a good many years and the demand keeps increasing.

The English Yew (*Taxus baccata*) is not reliably hardy in the north, and many do not realize that the Japanese, and many forms of *Media*, are perfectly hardy in and around Boston, and the Japanese even in northern New England.

They are not so particular as to character of soil except that it should not be too wet, but they do appreciate plenty of good plant food. They are immune to many insect pests and plant diseases so destructive to many other evergreens.

The Yew in its many species and forms can well be used in most all places where any other evergreen will do well.

We honestly believe you will do well to plant and grow on some of these Yews.

Grafting Is Easy

You have often wanted to propagate some plants of a scarce or high priced variety but did not have the proper facilities to do it with. With a new outfit we are offering, you can do it yourself, as easily as making an old-fashioned graft. You take a branch of the shrub or tree you wish to graft (leaving it on the parent plant) girdle the branch or twig, put damp peat moss or damp sphagnum moss around the girdled part and wrap it tightly with this new waterproof plastic (in sheets) and tie it, top and bottom, with rubber bands. Generally within six to eight weeks the twig is rooted ready to pot. It requires no watering or other attention until ready to pot. Complete outfit (enough plastic sheets and rubberbands to make 100 grafts) with complete instructions how to do the grafting, for \$5.00 postpaid.

TELL US HOW TO SHIP, whether by express, motor truck, or railroad freight. If by motor truck or railroad freight, tell us the route over which line you want delivery made. If you do not give this information we will use our own judgment as to route and methods to use. It is mutually agreed that whether you name the route or leave it to our own selection, we will not in any way be responsible for time or condition of delivery and our responsibility ceases upon our delivery to the transportation company.

Azaleas

Azaleas will grow in full sun or in shade. In the sun you will have brighter colors and growth will be shorter. We prefer a little shade if convenient. The small pot-grown plants should be planted about ten or twelve inches apart in a prepared bed consisting of about equal parts of good acid soil and peat moss or rotten leaf-mold, with about one-half shade.

Azaleas like acid soil with plenty of peat moss or leaf-mold in it. As a fertilizer rotten cow manure, cotton-seed meal and tankage are good. Use this in early spring and keep well mulched with peat moss or leaf-mold and keep the plants well watered during dry weather.

Azaleas have been one of our specialties for many years. This season we are pleased to offer the largest stock we have ever grown, and at reduced prices, too. If you have not been getting your Azaleas—Lining-Out or Specimen—from us, we wish you would try ours this season. We aim to please you with Azaleas as well as with our other stock.

KURUME AZALEAS

The Kurume Azaleas are one of the most showy of all flowers for the garden. They are also well adapted to forcing—thousands of them being sold for Easter, Mother's Day, and Decoration Day. They are comparatively easy to grow and make such a wonderful display that the demand is constantly increasing. Many of the varieties are hardy out-of-doors as far north as Long Island. They are extremely floriferous, and in season, the blossoms completely cover the plants. The colors are almost every hue and shade except yellow, as you will find below.

1 to 5 at each rate, 5 or more at the 10 rate, 50 or more at the 100 rate, 500 or more at the thousand rate.

Items marked by an asterisk (*) are classed as Lining-Out stock.

S. following size signifies Seedling.

GABLE'S HARDIER AZALEAS

Mr. Joseph B. Gable of Pennsylvania has spent almost a lifetime working with Azaleas and Rhododendrons. Many years ago he started breeding azaleas with the hopes of producing a hardier type of evergreen azalea in a good color range than then available. He has had wonderful success and is now recognized as the leader in this field.

You who have been getting our catalogs for the past fifteen years have seen how successful his efforts have been and there are many more of his later productions following as soon as sufficient stock can be produced.

We are very proud that Mr. Gable has furnished us with these new creations as soon as he had the stock to offer and we know from the reports we have received from our customers that his hopes have been more than realized.

As to hardiness: these varieties will average hardier than Hinodegiri and Amoena and much hardier than the other Kurumes. All have lived and flowered in the open field where they have withstood temperatures of twenty below zero and more in the past few winters with only negligible injury to a few. Most of them were uninjured. See article in Saturday Evening Post dated March 20, 1954.

U. S. D. A. AZALEAS

Some years ago the U. S. Dept. of Agriculture introduced a collection of Azaleas mostly from Japan. We have been growing these Azaleas many years and have selected the following varieties as the best ones in this collection. They are well worth trying.

CARMINATA SPLENDENS. Very fine bright red.

* 2 yr. field beds XX trans..	\$3.50	\$27.50
* 3 yr. field beds XX trans..	4.50	40.00

GIBIYAMA. A very good purple flowered variety.

* 3 yr. field beds XX trans..	\$4.50	\$40.00
-------------------------------	--------	---------

HO-ODEN. Pink edged white. Hose-in-hose.

* 3 yr. field beds XX trans..	\$4.50	\$40.00
-------------------------------	--------	---------

VUYKIANA AZALEAS

A new race of very large flowered Japanese Azaleas, produced by crossing hardy Azalea Malvatica hybrids with Azalea Mollis. Sturdy growers, prolific bloomers. From the information we have they are much harder than the Kurume Azaleas. Flowers range from 2 to 2½ inches. All bloom late midseason. Plants grow tall.

JOHANN STRAUSS. Single, rose flowers, blotched.

* 2 yr. field beds XX trans..	\$3.50	\$27.50
* 3 yr. field beds XX trans..	4.50	40.00

JOHN SEBASTIAN BOCH. Purple-violet. Tall grower.

* 3 yr. field beds XX trans..	\$4.50	\$40.00
-------------------------------	--------	---------

PALESTRINA. We are recommending this to use in place of Ledifolia Alba for a tall growing white bloomer. Last season when Ledifolia Alba were both bud and bloom killed, Palestrina came through without any wood damage and plenty of white flowers. Try it for a hardier tall white.

* 2 in. pot plants.....	\$1.75	\$15.00

HARDINESS OF PLANTS. When hardiness of plants is mentioned herein it applies only to this section unless otherwise mentioned.

Beautiful colors, long season of bloom, and hardiness of plants are the three factors that make Azaleas among the most desirable of all the flowering shrubs. They are happiest when grown in a mixture of common soil, leaf-mold, or muck, with a little well-rotted manure. The roots are near the surface, therefore a mulch of peat moss, leaves, or pine straw will be useful. Avoid lime, potash, or clay.

KAEMPFERI HYBRID AZALEAS

In these new Kaempferi Hybrids—the result of crossing Kaempferi and Malvatica—there has been obtained the hardiest type of evergreen Azalea, with a good range of form and color in the flowers so far achieved. Several years' tests have demonstrated that these new Hybrids are just as hardy as Kaempferi, until now the hardiest of the evergreen sorts. In connection with these Hybrids we suggest you try out the new Gable varieties we are offering.

ARNOLDIANA AZALEAS

In 1914, the late Jackson Dawson, then superintendent of the Arnold Arboretum, at Boston, Mass., created a splendid new type of hardy Azalea by crossing Azalea Kaempferi and Azalea Amoena. Of the seedlings thus produced a considerable number of them were grown at Boston from their infancy until flowering age, when the following ones of unusual beauty and vigor of growth were selected.

These Arnoldiana Azaleas have done exceptionally well in Indianapolis, Indiana, and we can recommend them for trial in similar soils and conditions.

MELLO-GLO. Cerise pink with golden suffusion.			
* 3 yr. field beds XX trans..	\$5.00	\$40.00	
12 to 15 in. B&B.....	\$2.25	20.00	

Why not offer your customers more of the newer plants? You can make more profit than with the older varieties.

CHUGAI AZALEAS

A new group from the Chugai Nursery Co. near Osaka, Japan. These are late flowering. Flowers are usually variegated, white or pink ground with red, lilac or purple stripes, white base with colored margin, or purple with white variegation and edge. These need more and wider trial before we can recommend planting in exposed or colder sections.

The following descriptions were furnished us by The Chugai Nursery Company.

FELDYK AZALEAS

From a famous grower in Holland. Introduced as "the Sweet Pea colored strain." They are crosses between *Malvatca* and *Kaempferi* and Japanese Azaleas. Have large bright colored flowers. Force easily, strong growers and very hardy. The blossoms exhibit all the delightful colors we most associate with Sweet Peas.

Prices of following varieties:

* 2 in. pot plants.....	\$2.50	\$20.00
* 3 yr. field beds XX trans..	5.00	45.00

- AARTJE.** Very bright red. 2 in. pots.

PSYCHE. Pure pink. 2 in. pot and 3 yr. sizes.

MERRITT AZALEAS

A collection of very worthwhile Azaleas produced by the late Dr. E. A. Merritt of Bethesda, Maryland. Have heard quite a bit about these Azaleas and finally secured a complete collection of them. We think they are well worth trying south of Philadelphia and possibly where the regular Kurume varieties will grow. The colors are bright and clean. Our stock plants look like they would make good forcing varieties.

We have a limited supply of most of these varieties. If you want some of them and will let us know which ones you want we will let you know what we can furnish.

A FASCINATING HOBBY

Growing Azaleas is a hobby which provides an ever increasing source of interest. There are so many species to be had and so many almost breath-taking new hybrids being produced, that one is amazed at the magnificent display that we may have with only a small space of ground and a few of the newer plants that are now being offered. If you want a stimulating (and profitable) hobby that grows more interesting, beautiful and valuable every year, then grow azaleas.

BELTSVILLE AZALEAS

Here is a group of Azaleas originated at the Plant Industry Station of the U. S. Department of Agriculture at Beltsville, Md. These are mostly good greenhouse flowering varieties as well as being hardy in colder sections. The descriptions of the named varieties are from descriptions furnished by the U. S. Department of Agriculture.

AZALEA ROOTED CUTTINGS

We expect to be having rooted cuttings of many of the varieties of Azaleas listed herein from now until June 1, 1955. If you will let us know varieties and quantities you want will quote on such as we can furnish.

Air Layering Plants

You have often wanted to propagate some plants of a scarce or high priced variety but did not have the proper facilities to do it with. With a new outfit we are offering, you can do it yourself, as easily as making an old-fashioned graft. You take a branch of the shrub or tree you wish to graft (leaving it on the parent plant), girdle the branch or twig, put damp peat moss or damp sphagnum moss around the girdled part and wrap it tightly with this new water-proof plastic (in sheets) and tie it, top and bottom, with rubber bands. Generally within six to eight weeks the twig is rooted ready to pot. It requires no watering or other attention until ready to pot. Complete outfit (enough plastic sheets and rubberbands to make 100 grafts) with complete instructions how to do the grafting, for \$5.00 postpaid.

MISCELLANEOUS AZALEAS

In the following list of Azaleas you will find many species; they are not classified or separated as to their different species. We are trying to give such descriptions that you may know, or have a general idea what each variety is like. 2-yr. seedling Azaleas are not as large as our 2-year Azaleas grown from cuttings. S. following size signifies seedling.

Tree Peonies

Because of their novelty and great beauty, Tree Peonies are rapidly becoming one of the most desired plants. They bloom earlier than ordinary Chinese Peonies and their flowers are of immense size. These plants are established in 5 inch pots and can be removed safely at any time. See page 23 for prices and descriptions.

PRINTING

After selling our printing department seven years ago, one of the young men (Charles L. Parker), who had been working for us, decided to start a printing business of his own. He will be very glad to quote on any work you may want done. With much pleasure I recommend him and am sure you will find him reliable in every way, and we both will appreciate any order you may place with him. Send all correspondence about printing direct to

GLENN DALE AZALEAS

We began growing these Glenn Dale Azaleas in 1941. During the past few years, since they are becoming better known, the demand has increased rapidly. Most all the reports we get from the growers are very enthusiastic. They are doing well in some sections where the evergreen varieties were not supposed to grow.

Many who have seen our fields of these Glenn Dale Azaleas in bloom expressed their amazement and joy at their size, coloring and quantity of bloom. You folks who have been dealing with us for the past many years know we do not recommend a plant unless we really believe in it. We do suggest you try some of these Glenn Dale varieties if you can grow any of the other evergreen azaleas and while you may have some disappointments we feel sure you will be greatly pleased with their growth and beauty.

These one-line descriptions do not tell you much but we do have a special booklet that describes them much more fully. Sent on request—no charge.

Sometimes when Azalea flowers are described as striped or flaked on white they will appear as a solid color. When this occurs the branch should be cut out. This seems inherent with the variety—not any fault of the nurseryman.

Capital Letters after variety name indicate sizes available in that variety, as capital B means 2 in. pot plant size, capital C means 2 yr. field beds XX trans., and so-on. We hope you will understand this system of indicating sizes as it saves a lot of space in catalog. We have been using this system for Crabapples several years and it seems to be working fine.

We will furnish one to five plants of a variety and size at each rate; five to 25 of a variety and size at the ten rate; 25 or more of a variety and size at the 100 rate.

HORTICULTURAL BOOKS AVAILABLE THROUGH US, POSTPAID

AZALEAS—Kinds and Culture by H. H. Hume

This new book, written by an outstanding authority, presents a wealth of up-to-date information on Azaleas. All details in the successful growing of Azaleas are carefully explained. Describes typical soils; how to grow them to the most favorable condition; best method of planting and growing on; how to feed, mulch, and water them; control pests and insects and various methods of propagating them. Beautiful full color and black and white plates. Worth many times its cost of \$5.00 postpaid.

AZALEAS and CAMELLIAS. Hume. \$2.75.

Just plain, everyday information on propagating, planting and growing Azaleas and Camellias. Invaluable to the beginner.

HOLLIES. A new book by H. H. Hume. \$6.75.

Nurserymen and gardeners (amateur and professional) all have been waiting eagerly for a book of this sort. This is the most complete book on Hollies ever published.

In this book is the help and information as to varieties, propagation, planting, culture and orcharding of Hollies.

The many varieties of American, English, Chinese and Japanese are fully described and discussed. Many black and color illustrations. Price, \$6.75

THE NURSERY MANUAL. Bailey, \$5.75.

Indispensable to everyone who propagates plants! This manual contains an alphabetical list of plants with full directions under each, telling how to propagate by seed, layering, cutting, budding, or grafting. Dr. Bailey includes an invaluable description of the main insects and diseases and their control. 240 illus.; 465 pages.

HORTUS II. (Bailey) \$12.50.

Easy to use, accurate, and non-technical, this great book comes closer than any other single volume to answering all your garden questions. It contains complete information on every kind of ornamental, fruit and vegetable plant grown today. 778 pages.

MANUAL OF CULTIVATED TREES AND SHRUBS

Alfred Rehder. \$12.50.

This standard reference will be welcomed by all who are interested in the cultivated trees and shrubs hardy in North America. It presents a systematic and descriptive enumeration of 2,550 species and their many varieties. Identification is facilitated by analytical keys. An exact description of each tree is given together with brief notes on its economic and ornamental properties. A glossary, complete index of authors' names and a map showing zones of hardiness are also included. Map; 996 pages; 5 $\frac{7}{8}$ x 8 $\frac{3}{4}$ inches.

BLUEBERRIES

Just loads of delicious berries

There has developed an enormous demand for these plants especially for fruit. If you have not been getting some of this trade you are missing some good profits. They are easy to grow and handle.

* EDCO IRON

*(The Chelated Iron in This Product Is "Sequestrene" Brand)

For experimental use in the control of chlorosis (lack of chlorophyll) in azaleas, gardenias, roses, citrus crops, etc.

Results to date have shown Edco Iron to be very effective in correcting chlorosis in the above crops. Chlorosis may be caused by the excess or deficiency of several major or minor nutrient elements in the plant besides iron, and it may be caused by an excess of water or its lack, but Edco Iron commonly seems to help correct the effect if not the cause of these several conditions.

Preliminary test work conducted with this material shows some wonderful results.

Full directions for using with each lot.

Prices: 1 lb. \$2.30; 10 or more lbs. at \$2.00 per lb. delivered.

GROW CHESTNUTS

WITH THE BLIGHT RESISTANT ORIENTAL VARIETIES

Most people know that a terrible scourge (blight) has befallen our native Chestnut tree, but many do not know that the Oriental species are resistant to this blight. These foreign Chestnuts also bear when very young. We had nineteen burrs averaging three nuts each on a tree 40 inches tall. These trees are not as tall growing as was our American species, but grows more spreading, making a round top tree.

There is very much interest in these foreign species and we are very fortunate in having a nice supply to offer this season.

FUMIGATING MATERIALS

The materials we are offering for use by nurserymen and florists are ones that we are using and can recommend. These fumigating materials are used under supervision of the U.S.D.A. in treating nursery stock for shipment outside Japanese Beetle area as well as for many other controls. Ask your Federal Inspector or County Agent about use of them.

LARVATOX WITH CHLORDANE

A new material recently authorized by the U.S.D.A. that kills the Japanese beetle eggs as well as the grubs. Potted and B and B plants dipped in a solution of this material may be shipped the entire year providing soil and air temperatures are maintained at a minimum of 60%. Will have value as a soil fumigant. Use 3 CC's to make 1 gallon of dip.

Quart (makes 315 gallons of solution).....\$2.50

ROOT GRAFTS

We are again making Root Grafts of stock that is very much in demand at this time. Advise ordering before Christmas if possible as we may not be able to furnish if ordered late. We will make up and reserve for shipment at the time you want them, or will send as soon as we get them made.

FLOWERING CRAB

Price \$15.00 per 100. For list of varieties, see page 53.

RED OR PINK FLOWERING DOGWOOD

Price \$20.00 per 100

LILACS

Prices of standard varieties \$15.00 per 100. See page 18.

Air Layering Plants

You have often wanted to propagate some plants of a scarce or high priced variety but did not have the proper facilities to do it with. With a new outfit we are offering, you can do it yourself, as easily as making an old-fashioned graft. You take a branch of the shrub or tree you wish to graft (leaving it on the parent plant), girdle the branch or twig, put damp peat moss or damp sphagnum moss around the girdled part and wrap it tightly with this new water-proof plastic (in sheets) and tie it, top and bottom, with rubber bands. Generally within six to eight weeks the twig is rooted ready to pot. It requires no watering or other attention until ready to pot. Complete outfit (enough plastic sheets and rubber bands to make 100 grafts) with complete instructions how to do the grafting, for \$5.00 postpaid.

RED LEAF JAPANESE BARBERRY

(*Berberis Thunbergi Atropurpurea*)

We have a very nice lot of Red Leaf Japanese Barberry in lining-out sizes. Last season did not have near enough to fill our orders for this but have a larger stock this season and will appreciate your orders for it.

The *New* BENNETT HYBRIDS ILEX CRENATA

See pages 14 and 15 for sizes and prices.

These new Ilex Crenata Bennett Hybrids are natural crosses between Ilex Crenata Convexa, Ilex Crenata Rotundifolia and Ilex Crenata Microphylla; all of which are compact growers needing little or no trimming for full specimens or block planting. They have been selected for leaf type and for compactness of growth.

Fast enough grower to make you money yet slow enough so it may be used around the ranch or low-foundation house.

As easy as the other Crenata varieties to grow and as resistant to diseases and insects as most any plant. Grows in light or heavy soil.

MALUS—FLOWERING CRABS

The Flowering Crabs are among the most charming of spring trees. They are not only beautiful when in blossom but many carry most ornamental and richly-colored fruit in the autumn. Most of the Crab family form graceful garden trees of medium size. They are quite hardy and require no particular cultivation, thriving best in a good loam and full sunshine.

For sizes and prices see page 19.

ALMEY. A new, very beautiful crab. Bright red flowers, small scarlet fruit.

BACCATA COLUMNARIS. Narrow upright form with white flowers.

CORONARIA FL. PL. A double flowering type of above.

DOROTHEA. Two-inch double pink flowers in immense quantities. Many think it better than Bechtel's.

ELEYI. Upright habit, young foliage purplish red. Deep red flowers and fruits.

EVA RATHKE. Pink flowers. Branches weeping.

FLORIBUNDA. Enormous masses of flowers red in the bud, pale pink when expanded.

FLORIBUNDA Atropurpurea. One of the best; purple foliage and flowers, dark purple fruit.

GLORIOSA. Of pyramidal habit with bronzy foliage, carrying a profusion of large rosy wine-red blooms.

HOPA (Red Flowering Crab). A remarkable tree, which is entirely covered with rose-colored blossoms in May. Fruit is red inside and out. Very hardy.

JAY DARLING. Red foliage resembling Japanese Blood-red Maple. Masses of red flowers, followed by scarlet fruits which are excellent for preserving. Similar to Eleyi.

KATHERINE. A new hybrid. Double pink flowers, red fruit.

LEMOINEI. Flowers deep purplish red. Fruit deep red. Foliage purple.

MATTHEW. Pink flowers, large yellow fruit.

MICROMALUS. Upright or vase-shaped. Blossoms pink, fruit yellow. Very early bloomer.

This shows one way to use this shading. We stretch wires over beds about 16 inches from ground.

Woven Lath Shading

Our woven lath shading is an efficient and economical material for the protection of newly set rooted cuttings, seed beds and small seedling transplants. It protects them from the hot rays of the sun and strong and destructive winds.

The construction of the beds is simple. You can use narrow boards (4 inch) nailed on small stakes (2 x 2 inches or 1 x 4 inches), or you can do as we do. We stretch two wires three feet apart over a four foot bed; this will leave the lath shading extending over each wire six inches. This makes it easy to roll and unroll the shading without rolling off the wires. The wires are placed about 16 inches from the ground, thus giving the small plants plenty of room to grow before reaching the shading.

This Woven Lath Shading is easily handled, and when not in use you just roll it up and store away until ready to use it again.

The laths or pickets are approximately $\frac{3}{8}$ inch thick x $1\frac{1}{2}$ inch wide and 4 ft. long and are woven with five double strand $12\frac{1}{2}$ gauge galvanized wire, spaced about the right width apart to give proper shading.

This Woven Lath Shading is painted with a solution of red mineral oxide, greatly extending the life and use of the shading.

It is made in rolls of 50 and 100 feet. Can be easily handled by one or two persons.

It is also useful for making fences, to protect new plantings of grass and shrubbery around parks and fields and many other uses you may find for it. Can be easily rolled up again at any time and stored in a small space for future use.

A little investment in proper protection of tender and newly planted plants may save you many tedious hours of labor, considerable expense and may even save you an entire season's growth of your valuable plants.

Why take chances of sun ruining your plants? You can get over 3,000 plants under 100 feet roll when planted 4 in. apart each way.

Another big advantage of using this Woven Lath Shading is that you can water your plants even while the sun is shining hot on them. This means a lot in continued dry weather. Price: Up to 500 ft. at 23 cents per running foot, over 500 feet at 22 cents per running foot.
